R 1200 R "Trophy"

We were excited by the regained simplicity of the new R 1200 R, it felt easy for us to tailor a classic outfit for it.

Inspired by the legendary R 90 S and the R 100 CS (a favourite of Mr. Wunderlich) a modern classic was created. The classic looking half-fairing and colour scheme retains a certain racing feeling.

In our mind, clothing the "Trophy" with carbon fibre parts seemed inappropriate. Therefore we treated it with steel engine bars in typical classic style, as used in the past for any Boxer, no matter if sport or touring machine. Over 20 years of BMW experience allowed us to choose substantial improvements that increase safety and provides a better, joyful riding experience.

A selection of the parts fitted:

- High strength upper fork clamp with tapered RIZOMA handle bars and 4 cm horizontally adjustable handle bar position.
- VarioLever set.
- ERGO seat.
- Front indicator relocation below the tank.
- RIZOMA LED indicators at the back.
- Rear light "Triton2" with LED technology.
- ZARD PowerGun exhaust and header pipes.
- Chilli-Power motor with 120 HP.

Also fitted (only for the concept bike):

- Lightweight spoke wheel set.

...and much more...

For more information about R 1200 R parts and accessories see our website and ask your local Wunderlich dealer. Catalogue sections will be published at www.wunderlich.de/update.
